

PROFESSIONAL DOCTORATE OF ALTERNATIVE MEDICINE

The professional Doctorate of Health Sciences in Complementary Medicine focuses on advanced knowledge and research in complementary medicine. You'll explore various modalities, enhance your analytical skills, and apply evidence-based practices to patient care.

The purpose of the Doctor of Health Sciences in Complementary Medicine is to provide the qualifying student with advanced analytical problem-solving and reflective competencies in the field of complementary medicine and to enable them to act as a leader within the Complementary Medicine research field. This will be achieved by making an original contribution to the knowledge content of Complementary Medicine through independent research.
